Zendoodle Practice Sheet

Name: _____

Instructions:
Always start your zendoodle with a 'string' using pencil. A string is simply a line that breaks up the space into separate areas. In your practice squares you should always use either multiple zendoodles or a zendoodle from different perspectives. The first box includes a starter string. When you draw zendoodle always draw in ink. Mistakes will be hidden by the repetition, pattern and rhythm that is created so don't worry about that!
