

Create a colour wheel using things you can find around the house, like the example below...

Here is what you need to do...

**Option ONE**, collect as many objects from around the house, put them on the floor in the circle and then take a photo from above, like you are a bird looking down! Save your photo in your Photos folder in your visual Art folder.

**Option TWO**, if you find it hard to get enough objects showing all the colours, you can go around the house taking photos and then construct the circle/colour wheel on word, photo shop etc. Save this in your Visual Art file.

Steps to take...

1. To get some **inspiration** spend a little time looking through google image, it would be a good idea to copy and paste whatever images you have used to inspire you with your final colour wheel...

Create a page for this task in your personal page, start by **copy and pasting the images** you want to attempt and like.
2. Now start walking around your house, what can you see, what can you use? Now make your decision, **Option ONE or TWO?**

**Start creating...** If you are doing **Option ONE**, take at least **10 photos** to show how you got to the final colour wheel, these show show the rearranging and moving around of the objects. Annotate appropriately.

If you are doing **Option TWO** put the photos **you will use** to create the colour wheel in your page.

I want to see the **process** you went through! Annotate appropriately.

3. Take a photo of the final arrangement or save a copy as your final and put a final image on your page titled **FINAL**.

**Helpful hints...** Photograph your colour wheel on a plain background, preferably black or white, as you can see below!

**Due Date:** You will have 2 lessons to work on this. The photo of your Colour Wheel must be put in your personal page, in an appropriately titled page by the **end of your next lesson**.
